

Our Natural Heritage

GARRICK FOREST RESERVE

Most of the remaining natural forests in Fiji is on steep and broken mountainous country and difficult to access. This is

dominated by Tropical Moist Forest that is more commonly known as 'rainforest'. One of the protected rainforest areas in Fiji is the Garrick Reserve, that is about 15mins drive from Navua Town.

This 429ha rainforest land was given to the National Trust by the Garrick family in 1980. The reserve consists of old growth lowland forest and has the only protected populations for two recognized Fijian endemics;

Soga - Sago palm (*Metroxylon vitiense*)

Nanai - Fiji's 8 year Ciccada (*Raiteana knowlesi*)
